

PREMIUM ENGINEERED BLAST ABRASIVE

| TYPE | SIZE | APPLICATIONS | PROFILE (MIL)* | SSPC AB-1 |
|--------|-------|---|----------------|-------------|
| Fine | 30/60 | Feather & Brush Off Light Mill Scale Water Vapor Blast Systems | 2.0–3.5 | Grade 3 |
| Medium | 35 | Most Light Work Medium Mill Scale New Structural Steel | 2.5–4.0 | Grade 3 & 4 |
| Coarse | 16/30 | General Purpose Shipyards Heavy Mill Scale Exposed Aggregate Concrete | 3.0–5.5 | Grade 4 |

APPROX. SIZE DISTRIBUTION

*Approximate profiles based on Mil Scale removal at 80 PSI nozzle pressure.

APPLICATIONS

Kleen Blast is the abrasive most often specified for Navy and civilian shipyards, Departments of Transportation and municipalities. It is the abrasive most blasting and coating contractors select as their abrasive of choice. From ships, bridges and refineries to auto shops and finishers—**Industry Chooses Kleen Blast!**

ENVIRONMENTALLY SAFE

Kleen Blast is a water quenched Iron Alumina Silicate, this removes most soluble metals at the cooling stage and hardens the particles. We then fresh water wash the material, removing unusable fines, dust and soluble chlorides. This creates an inert, amorphous **Zero Free Silica** worker safe blast media. All RCRA 8 Metals + 17 California metals are either non-detect or way below regulatory levels.

HEALTH AND SAFETY

Independent test results show Kleen Blast has an excellent cleaning rate, thus reducing consumption of media on the job. With the MOHs hardness of 7.8-8.2, Kleen Blast is the hardest mineral slag abrasive. The powerful cutting capability, low friability, and magnetic-free properties of Kleen Blast, makes it a fast, clean and affordable abrasive. You will get an optimum anchor pattern and extend the coating life on surfaces prepared with **Kleen Blast**.

QUALITY CONTROL

Kleen Blast is available in 3 sizes that have become the industry standard. Our capacity for blending custom products to meet specific needs allows us to meet the challenges of even the most demanding projects.

We Sell Blast Abrasives:

- Aluminum Oxide
- Crushed Glass & Beads
- Garnet
- Silicon Carbide
- Steel Grit & Shot
