KLEEN KUT WATERJET GARNET

About:

Kleen Kut 80 HPXP Waterjet Garnet is a strong, natural mineral that outperforms other garnets due to its unique properties and our advanced processing methods. Unique grain hardness, toughness, density, and angularity ensure perfect edge quality on any material with a thickness of up to 30 inches. Kleen Kut 80 HPXP strikes the perfect balance of cutting efficiency and edge quality for results that improve production time and cost.

KLEEN KUT[™] WATERJET GARNET

The Benefits:

Kleen Kut 80 HPXP Waterjet Garnet cuts faster, deeper and straighter, empowering the operator to do more in less time than any other garnet. Sharper, more angular edges cut faster, improving productivity.

Better edge quality improves the cut. HPXP garnet produces better edge quality and can be used in demanding applications where other waterjet garnets fall short.

Less dust reduces operator risk. Superior hardness helps HPXP garnet to produce less dust than any other waterjet garnet.

Cleaner operation means less downtime. HPXP garnet, because it is an inert, non-toxic, naturally occurring mineral, is the cleanest waterjet cutting media available. The result is a cleaner workspace and less downtime due to clogged jets or erratic feed.

The Uses:

Kleen Kut 80 HPXP Waterjet Garnet is a highly versatile garnet that combines reliable quality and excellent waterjet cutting performance. Ideal for a host of applications from cutting thick steel, stone and aluminum to composites, ceramics, glass and more.

Sizes Available:

80 [55# bags & 1.1UST bulk bag]

PRODUCT	FOCUSING TUBE	ORIFICE
KleenKut 80 HPXP	0.030" - 0.040"	0.010" - 0.014"
