KLEEN STRIP

KLEENSTRIP™

About:

Kleen Strip Kieserite Blasting Abrasive

Kleen Strip (Magnesium Sulphate / Kieserite) is a water-soluble, environmentally-friendly soda blast abrasive that blasts and removes paint in one step without shutting down process streams. It is much more aggressive for soda blasting than baking soda abrasives, yet safe to use around rotating equipment, bearings and sliding mechanisms. It also will not corrode aluminum jacketing and damage brass or copper electrical contact closures.

Typical applications:

- Marble and stone restoration
- Boat bottom paint removal
- Graffiti removal
- Log home restoration
- Mold remediation
- Coatings removal
- Mill scale removal
- Building restoration
- Decontaminating
- Soot sandblasting
- Deodorizing
- Car restoration
- Sculpture restoration
- Tile restoration
- Medium to heavy rust scale removal

Kleen Strip Pool Tile Sandblasting Formula

Kleen Strip Pool Tile Sandblasting Formula is specially formulated for sandblasting swimming pool tiles to safely blast dirty grout and remove calcium, oily residue, mold or algae. It is blended to flow through Kleen Blast equipment and provide less floating debris for quicker cleanup.

Typical applications:

- Pool tile sandblasting
- Fountain tile sandblasting
