

BULLARD TYPE II +

Safety Helmet

The Bullard Type II + is an advanced safety helmet that delivers both top and side impact protection with a sleek, balanced design. Engineered for all-day wear, it offers breathable comfort, customizable style, and advanced safety options to meet the demands of any job.

● Industrial

Increased Impact Protection. The Type II + provides ANSI-certified protection against top and side impacts.

FlexBrim™ Removable Brim The exclusive FlexBrim quickly converts the Type II + from a Safety Helmet to a Full Brim Safety Helmet in seconds. With 10 helmet colors and 10 brim colors available to mix and match, workers can build over 100 combinations for the fit and style they want.

Comfort and Fit. An internal breathable mesh crown helps reduce heat buildup and improve airflow, allowing heat to escape from the wearer's head, amplifying air movement. The breathable mesh crown support helps evenly distribute helmet weight to reduce pressure points and create secure balance. It also creates an adjustable center of gravity, and allows the user to raise or lower the ride of the helmet for a secure and comfortable fit. The adjustable suspension features a self-adjusting nape support for a locked-in fit without constant readjustment, accommodating head sizes 6¼ to 8 (50-64cm).

Durability and Flexibility. Field-replaceable components, including FlexBrim, brow pad, mesh crown support, suspension, chinstrap, and accessory clips, extend helmet life while reducing total cost of ownership. Tool-free replacement makes swaps quick and easy.

Accessory Compatibility. Integrated slots securely support hearing protection (coming soon) and sunshades and neck shades (compatible with most brands). Other compatible accessories include, lights (band and adhesive mounted), and face visors and retractable eye protection (coming soon).

Smart and Safety Technology.

- Mips® Safety System (coming soon)
- Twiceme® Smart Technology (coming soon)

Customizable. Customize with long-lasting logos and striping through BuildYourBullard.com, featuring real-time previews and easy reordering.
